

## Minimizing Compliance Risks

Adlib provided high availability, load balancing, and extensive reporting, and automated the transformation of tremendous volumes of documents while meeting compliance requirements.

### THE CHALLENGE

To automate the process of transforming eDiscovery and Case Management legal documents and images with appropriate metadata for redistribution to attorneys, this government agency needed to implement a solution that could be automated.

They were faced with a number of intricate challenges. This government organization needed to:

- Manage huge volumes of current documents and images
- Convert documents and images to PDF in an efficient and fast manner
- Remove the risk of non-compliance with regulatory requirements

### THE RESULT

High availability and load balancing are critical when dealing with large volumes of documents, which is exactly what this customer needed. Handling everything from single departments to multi-site installations, Adlib's solutions—with high availability, load balancing, and extensive reporting—take the pain out of meeting compliance requirements and automating the transformation of tremendous volumes of documents.

By using Adlib PDF, this government organization was able to achieve a number of benefits:

- Enormous numbers of existing records processed
- Replacement of manual processes with automated custom coding
- Decrease in errors and risk
- Ability to demonstrate compliance with regulations
- Reduction in costs for training personnel

Advanced Rendering enabled this government agency to meet compliance regulations while managing large volumes of documents.

### THE DOCUMENTS

eDISCOVERY DOCUMENTS, CASE MANAGEMENT FILES AND IMAGES

### WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
