

Enterprise Data Extraction

Extract the Highest Quality Data from the Broadest Range of Formats

With Adlib, no file format is too broad, no collection of content is too vast, and no document is too complex. Adlib's extensible Data Extraction software discovers, standardizes, and extracts the highest quality data from complex documents in the broadest range of formats—automatically and at scale. Whether we're working with 5,000 or 500,000 documents in 30 or 300 formats, our Data Extraction software automatically discovers, cleans, classifies, and extracts the vital data you need. Because when you spend less time muddling through manual tasks, you can focus on what really matters: moving business forward.

Drive Business Traction with Robust Data Extraction

IDENTIFY & ADDRESS CONTRACTUAL RISK

Automatically find and extract data from contracts to eliminate costly manual review and enhance your ability to find and manage contracts as a strategic asset.

SIMPLIFY COMPLIANCE

Address compliance mandates by gaining clear visibility into all corporate data to meet regulatory requirements including locating PII in support of GDPR.

DISCOVER INSIGHTS FROM DATA ANALYTICS

Make better business decisions and feed your insight and analytics engines by tapping into the vast stores of data hidden in unstructured content.

IMPROVE CUSTOMER EXPERIENCE

Automate and integrate the data extraction process to deliver faster, more personalized customer experiences.

AUGMENT RPA

Ensure end-to-end RPA bot automation by creating a steady stream of machine-readable data.

- Brexit-Related Content
- Merger & Acquisition Content
- LIBOR/IBOR Content

How Adlib's Data Extraction Software Works

Adlib solutions leverage innovative AI, NLU, and ML technologies with a scalable, extensible platform designed to solve the most challenging contract analytics use cases in banking, insurance, manufacturing and beyond. Whether it is dealing with ingesting M&A content, reacting to new or changing regulations, or optimizing buy/sell-side contract processes; Adlib is ready to exceed your expectations.

With Adlib we can pull insights from complex documents we couldn't discover before. This opens up endless possibilities for our customers—and our business.

— Keith Parent, Founder & CEO, Court Square Group
