

Integrating with Leading Content Stores

Adlib transformed hundreds of thousands of documents daily, performed high-volume conversions in fully automated mode, and integrated into Microsoft® SharePoint® to help this banking organization improve their document processes.

THE CHALLENGE

A diversified investment bank needed to implement an easy-to-use system that accepts various content types and automatically transforms and combines them into a high-quality, searchable PDF file.

They were faced with a number of difficult challenges. This organization needed to:

- Implement a system that is easy to use for knowledge workers
- Find a cost-effective solution
- Have the ability to accept varying file formats and merge them into single PDF
- Integrate with SharePoint

THE RESULT

Enterprises today often need to transform hundreds of thousands of documents daily. Adlib integrates into the content repositories that leading firms—such as this investment bank—rely on (including SharePoint), and perform high-volume conversions in fully automated mode, as demonstrated by the success of this customer's story.

By using Adlib PDF, this banking organization was able to achieve a number of benefits:

- Reduction of costs with a single, easy-to-use system
- Implementation of an automated PDF rendering solution that increased accuracy and eliminated human error
- Introduction of searchable PDF files
- Integration of PDF rendering with SharePoint

Advanced Rendering enabled this investment banking company to integrate their PDF rendering software with their existing document repository.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
