

Leveraging Digital Signatures

With Adlib PDF, this global manufacturing organization was able to implement a paperless workflow enabling digital signatures and satisfying compliance requirements.

THE CHALLENGE

This global company in motion and control technologies needed to render their engineering documents and eCAD drawings in a Dassault Systèmes environment to support the company's compliance audit requirements.

They were faced with a number of problematic challenges. This organization needed to:

- Improve the difficult process of obtaining digital signatures
- Modernize the out-to-date process that was being ineffectively used to demonstrate compliance
- Digitize paper-based workflows
- Integrate tightly with their Dassault Systèmes environment

THE RESULT

At Adlib, compliance plus automation equals efficiency. Inefficient paper-based processes waste valuable time, causing this global manufacturer to turn to the leader in Advanced Rendering technology. Adlib's cutting-edge conversion techniques include the application of digital signatures where required and also meet compliance auditing needs through end-to-end tracking of document-centric processes.

By using Adlib, this global manufacturing organization achieved a number of benefits:

- A trackable process which is used to prove compliance
- Implementation of an automated workflow to enable digital signatures
- Introduction of a paperless policy to improve efficiency
- Seamless integration with Dassault Systèmes

Advanced Rendering enabled this manufacturing organization to replace inefficient paper-based processes with automated digital ones, saving time and money, and satisfying compliance auditing requirements.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
