

Creating Perfect Paydays

By using Adlib, this municipal government automated the process of rendering and assembling employee payroll records, thereby reducing costs and providing critical employee information with greater speed and accuracy.

THE CHALLENGE

A municipal government with multiple departments required a PDF tool to render 12,000-15,000 documents every two weeks and make results available to 900 employees. Multiple documents needed to be merged into a single document.

They were faced with a number of interesting challenges. This organization needed to:

- Ensure immediate access to PDF results for employees
- Coordinate different systems in an efficient manner
- Merge many document types into one document
- Extract useful data from pre-formatted content

THE RESULT

By automating the process of rendering and assembling employee payroll records from different sources, Adlib was able to reduce costs and provide critical employee information with greater speed and accuracy.

By using Adlib PDF, this government organization was able to achieve a number of benefits:

- ✓ Extraction of content from individual pages into single employee records
- ✓ Enablement of faster access for employees to critical information
- ✓ Reduction in costs by automating PDF rendering vs. previous manual process
- ✓ Provision of a single, comprehensive, and scalable solution

Advanced Rendering enabled this government organization to merge 12,000-15,000 documents every two weeks, and make them available to 900 employees.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
