

## Delivering Scanned Images Online

With Adlib, scanned images of planning applications provided a precise, convenient mechanism for sharing information with council users through web-based PDF access.

### THE CHALLENGE

A government planning department was looking to implement a rendering solution for converting scanned images of planning applications (JPGs) into PDF and then placing the PDFs online.

They were faced with a number of unique challenges. This organization needed to:

- Create an efficient system for getting their files online
- Ensure scanned images were of high-fidelity
- Find a method of distributing scanned images efficiently
- Increase access to PDF files for users

### THE RESULT

Tasked with providing the images of planning applications online, this government agency found a clear solution with Adlib. Scanned images of planning applications provided a precise, convenient mechanism for sharing information with council users through web-based PDF access.

By using Adlib PDF, this government organization was able to achieve a number of benefits:

- ✓ Development of an automated system to replace the current manual one
- ✓ Creation of a process for scanning and applying OCR to images to improve document quality and ensure accuracy
- ✓ Deployment of an efficient distribution method for all scanned images using email
- ✓ Improvement in PDF access for all council users

**Advanced Rendering enabled this government organization to improve document quality and access through PDF conversion.**

### WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
