

## USE CASE

# Archive Automation Handles Large Volumes of Documents Easily and Compliantly

## CHALLENGE

A Danish Municipality with 6,500 users that provides healthcare and services, was looking to archive a large volume of historical documents. They were tasked by regulatory mandates to find a solution to both improve workflow and ensure compliance.

- They needed an alternative solution to their current desktop conversion process, which was slow and inefficient
- They wanted to implement an automated and effective workflow
- They were required by law to ensure that regulatory compliance could be demonstrated

## RESULT

Adlib replaced a slow, manual process with an automated solution that can easily scale to any number of users, enabling this Danish municipality to archive large volumes of documents more rapidly and meet regulatory requirements.

- Elimination of manual workflows increased organizational efficiency
- Demonstration of compliance aligns with records retention standards
- Capability to handle increasingly large volumes of documents is inherent in deployment
- Security is ensured with a locked output format

**WHAT IS ADVANCED RENDERING?**

Helping organizations globally unlock the value in unstructured content, Adlib's Advanced Rendering technology takes the most commonly-used Enterprise Content Management (ECM) systems to a new level through content standardization.

By automating the conversion of content from multiple sources into more manageable and usable formats, Adlib enhances content throughout its lifecycle, facilitating advanced data extraction, classification, long-term digital preservation and more.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for environments with a high volume of unstructured content where accurate, scalable and highly-available data is required across the enterprise.
