

## Enhancing PDFs for Better Compliance

Adlib addressed this device manufacturer's compliance requirements and replaced their manual process with an end-to-end automated workflow with added enhancements to their documents.

### THE CHALLENGE

An electronic medical device manufacturer needed to implement a PDF rendering solution to convert their credential documents. In addition, they needed the document conversion software to integrate with Microsoft® SharePoint®, their document repository.

They were faced with a number of difficult challenges. This organization needed to:

- Improve the current slow and manual process
- Demonstrate compliance to regulatory authorities
- Provide greater access to their consultants
- Enhance documents with features such as headers and watermarks
- Integrate directly with SharePoint

### THE RESULT

Adlib is able to enhance documents using sophisticated metadata-driven rules. Adlib's solutions help tackle compliance requirements with a range of enhancements, including watermarks, timestamps, page number sequencing, addition of headers and footers, generation of content lists and similar capabilities. This device manufacturer replaced their manual process with an end-to-end automated workflow:

- Complete elimination of a manual process
- Ability to prove compliance and enhance documents automatically
- The improved access to credential documents by consultants
- Seamless integration with SharePoint

**Advanced Rendering enabled this device manufacturer to enhance their PDF documents with a number of features and automate a slow and manual process, while proving compliance.**

### WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
