

Centralizing Key Tasks for PDF Creation

Adlib centralized the configuration and management of document conversion processes, easing support for data-intensive activities across the company.

THE CHALLENGE

An engineering company that specializes in tooling, materials technology and mining was looking to convert a high volume of engineering training materials and project documentation for all global sites to high-fidelity PDF.

They were faced with a number of complex challenges. This organization needed to:

- Deal with a high volume of documents with many minor and major content changes on a bi-monthly basis
- Create a system that can be used by 50-100 administrators
- Require all changes to be made quickly and accurately
- Translate large volumes of documents

THE RESULT

The configuration and management of Adlib's solutions takes place centrally, allowing administrators to set up, define, and manage the processes associated with PDF creation. The result: easier support for data-intensive activities across the company—which is exactly what this organization received.

By using Adlib PDF, this manufacturing company was able to achieve a number of benefits:

- ✓ Implementation of an automated PDF rendering process to address volume demands
- ✓ Creation of a centralized system used by all administrators across the company
- ✓ Development of a system to make document changes with speed and accuracy
- ✓ A system that provides ease of translation for large volumes of documents

Advanced Rendering enabled this manufacturing organization to implement a system for 50-100 administrators to use for document conversion.

WHAT IS ADVANCED RENDERING?

Advanced Rendering technology takes basic document-to-PDF conversion to a higher level by integrating into the most commonly-used Enterprise Content Management (ECM) systems and automating the conversion of content from multiple sources into more manageable and usable formats to enhance documents at each of the 4 stages of the document lifecycle: capture, manage, archive and deliver.

Adlib PDF Enterprise is the next-generation of Advanced Rendering technology that is ideal for high-volume environments where accurate, scalable and highly-available document-to-PDF conversion and transformation services are required across the enterprise.
